1 THE PROBLEM

88 % OEE looks fine. It hides 1,108 lost drives.

Monthly OEE · 21 shifts

88.0% target 85 %

Drives never built

1,108

Half is slow running — invisible in the downtime log

Warnings before a stop today

0

The same losses repeat every week

100 — **ST-038 · camera**
every Wednesday 09:08 · 4 of 4 weeks

60 — **ST-047 · leak test nest**
every Thursday 08:08

105 — **Shift hours 1 and 5 run slow**
start-up and after the break, every day

79% — **of scrap from three codes**
Q-031 leaks · Q-020 press-fit · Q-026 torque

Repeating means preventable — but nobody sees it on the floor.

Finds the loss, warns before it, names the fix

01 · LIVE DATA

Line data streamed every second — stops, scrap, speed by hour

02 · DETECTION ENGINE

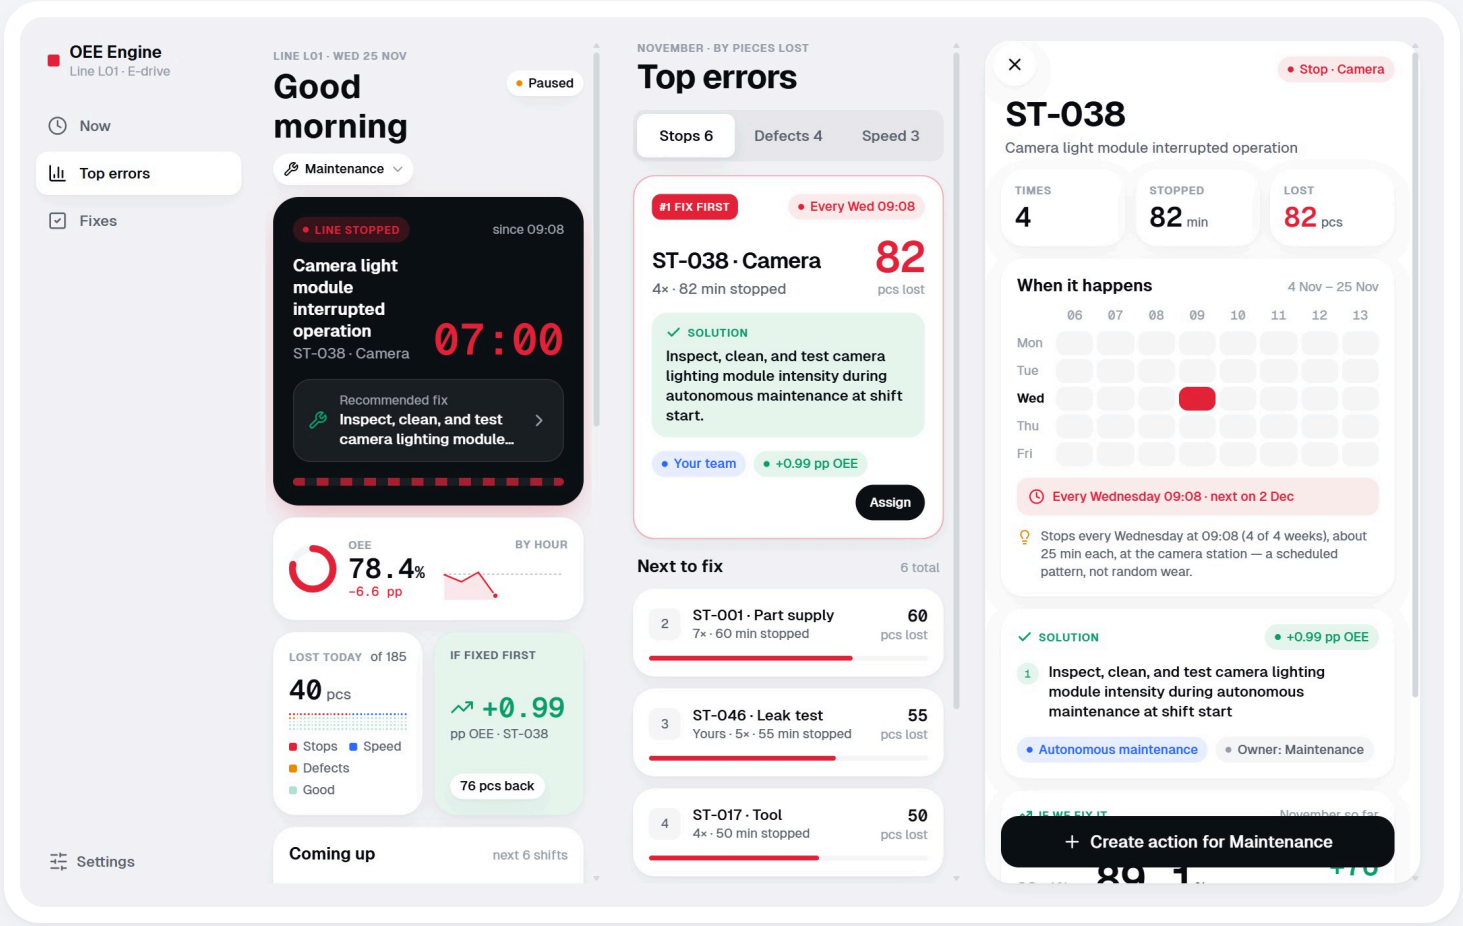

Finds repeating stops, slow hours, scrap causes; **predicts the next stop**

03 · AI ASSISTANT

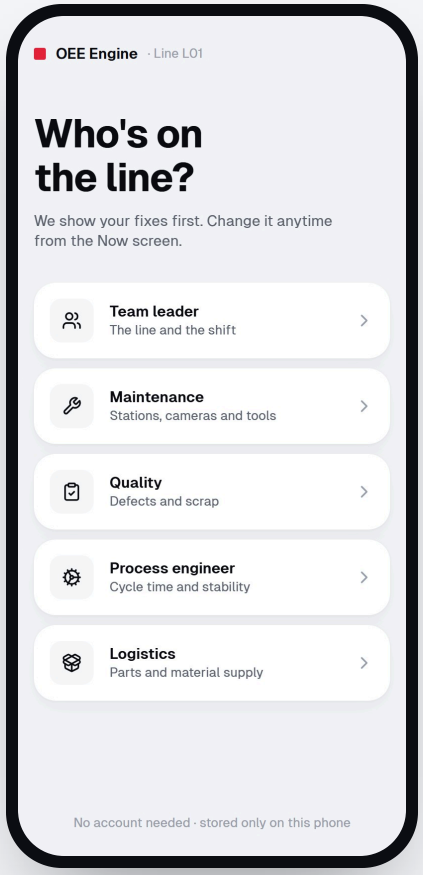

Gemini answers **“why?”** only from the line data — EN, SK, UK

04 · FIX WITH AN OWNER

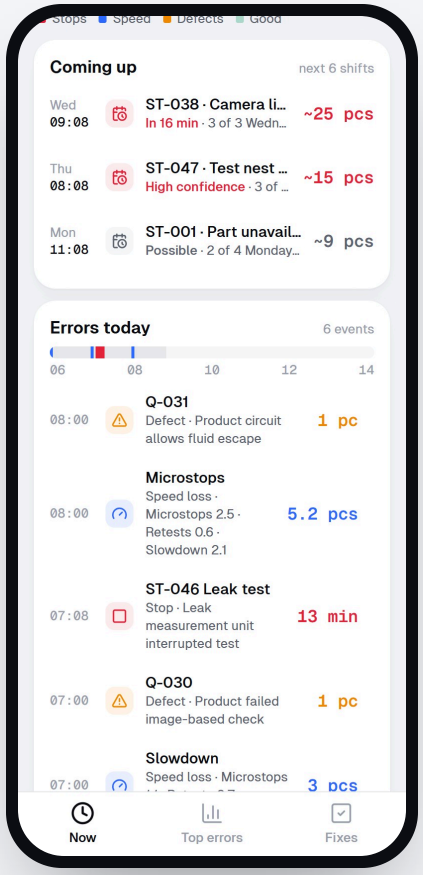

82 error codes → Lean countermeasure, owner role, OEE gain

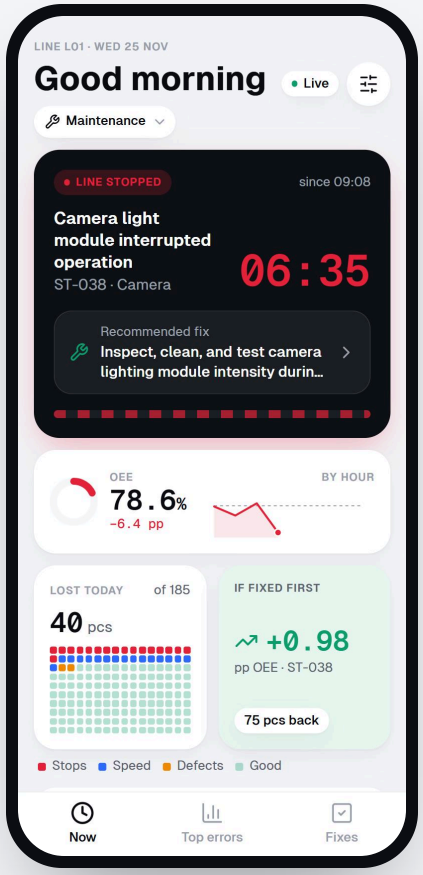

Who you are → what is happening → what comes next

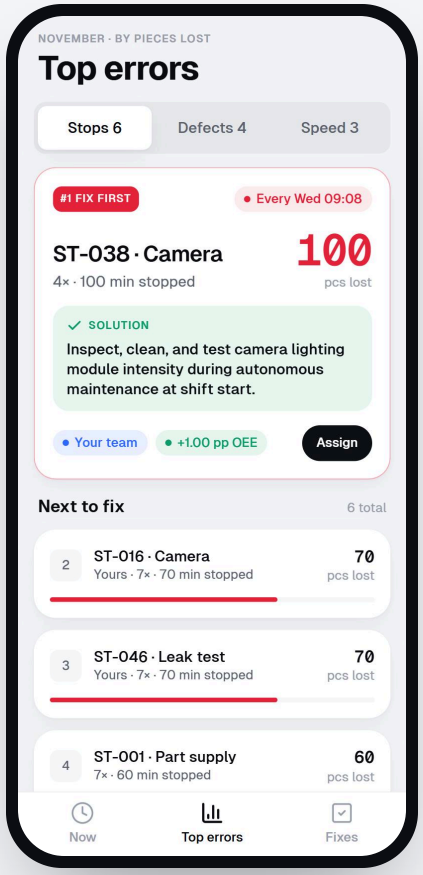

Pick your role
no account · your fixes first

Coming up
ST-038 expected in 16 min

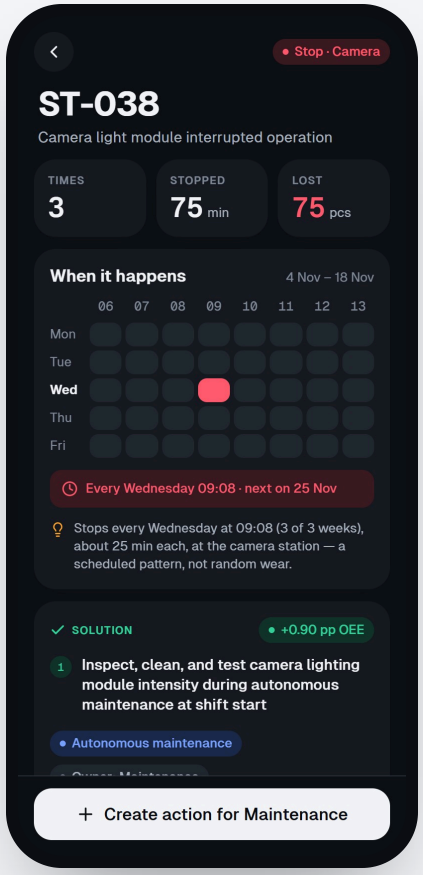

Now · line stopped
live timer + recommended fix

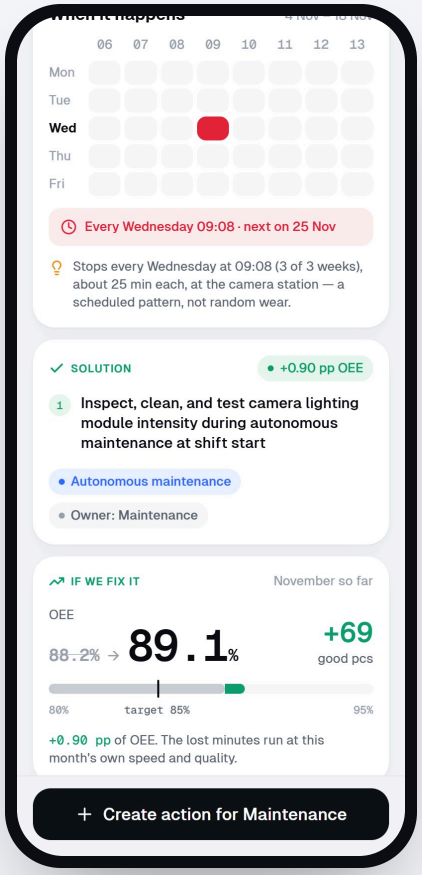

Top errors
#1 fix first, by pieces lost

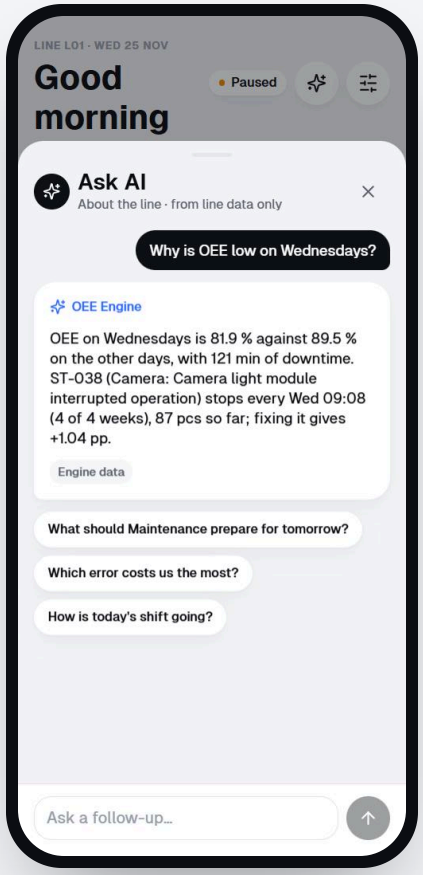

Why it happens → what fixing it is worth → who does it

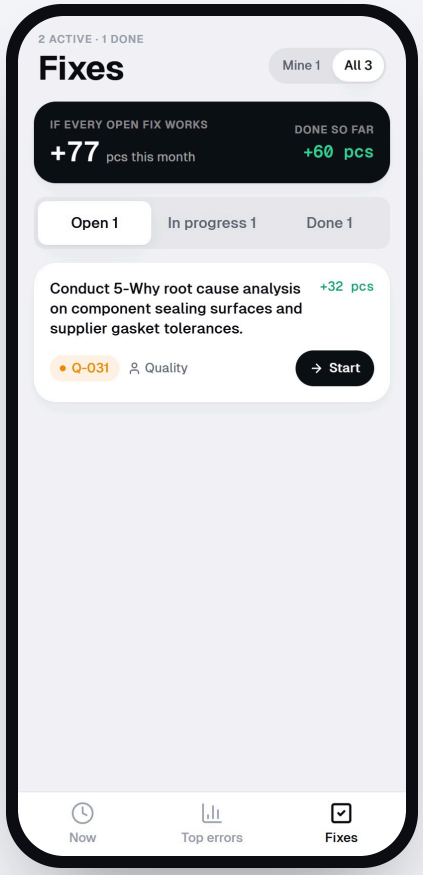

Error detail
every Wed 09:08 · dark theme

If we fix it
OEE before → after

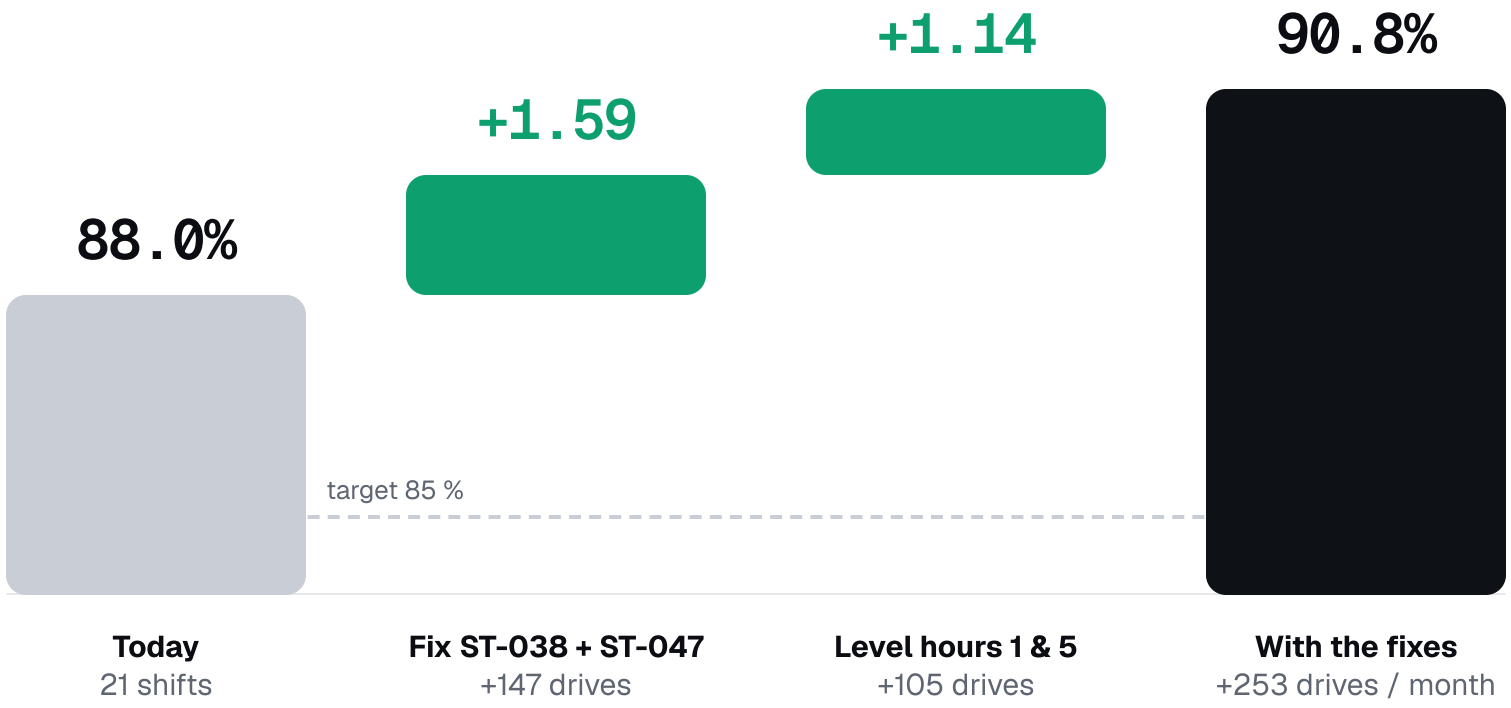

Ask AI
answers from the line data

Fixes
open → in progress → done

3 THE RESULT

+2.74 pp OEE · +253 drives a month · no new equipment

Before the stop

The team is warned that ST-038 is due — not told after it happened

Fix in one tap

Countermeasure, owner and OEE gain on the screen; action created for the right role

Hidden losses

Slow hours and microstops — half the loss — finally visible

What-if model: removed losses run at the month's own speed and quality. Fixes are standard work and autonomous maintenance.

Every loss visible.
Every fix owned.
Before the line stops.

88.0% → 90.8% | +253 drives / month | $0 CapEx
